Intellectual Property Management Statement

V5 Technologies | Innovation-Driven, IP-Guarded

Overview

At V5 Technologies, we embrace the philosophy of “Innovation-Driven, IP-Guarded”, dedicating ourselves to robust intellectual property (IP) protection to strengthen our competitive edge and ensure sustainable innovation.
We report IP-related matters to our Board of Directors annually, with the latest report presented on Oct 27, 2026, reflecting our commitment to transparency and governance.

IP Management Strategy

To safeguard R&D outcomes and transform them into strategic assets, V5 Technologies:

- Aligns IP protection strategies with overall business goals
- Promote innovation and global patent deployment
- Ensures annual reporting to the Board to monitor execution and drive continuous improvement

IP Management System

Our comprehensive IP management system includes:

Proprietary Information Protection

Institutional and technical safeguards to prevent leakage of key technologies and trade secrets.

Education & Awareness

Regular training for all employees, with tailored onboarding programs to build IP awareness and responsibility.

Cross-Department Collaboration

Joint efforts between R&D and operations teams to ensure seamless integration of IP strategy and execution.

Achievements & Future Outlook

As of 2026, V5 Technology has secured 50 patents across Taiwan, China, the U.S., and Japan, covering semiconductor and medical sectors.

Looking Ahead:

- Global Patent Expansion: Focus on high-potential markets and technologies
- Commercialization: Promote technology transfer and licensing to diversify revenue
- ESG Integration: Embed IP management into sustainability and governance frameworks

V5 Technologies will continue to treat intellectual property as a core asset, reducing operational risks and enhancing long-term corporate value.
